

Reference Object Multi-family House in Worms, Germany: External Thermal Insulation Composite System (ETICS) with Insulation Materials Made of Neopor®

- Energy-efficient renovation of a multi-family house built in 1975
- Duration: March to October 2013
- Building floor space: 310 m²
- Heating oil consumption before insulation: 5,000 l/ a; after insulation: 3,000 l/ a
- Quote by Ali Gencer, owner:

“The mould growth and high consumption of heating oil are a thing of the past. The main concern for me was my family’s health and the financial benefit from lowering the heating costs. I can definitely recommend installing insulation.”

Before renovation

A. Gencer
