

Reference Object Single-family House in Mannheim, Germany: External Thermal Insulation Composite System (ETICS) with Insulation Materials Made of Neopor®

- Energy-efficient renovation of a single-family house built in 1972
- Building floor space: 100 m²
- Duration of insulation measures and roof renovation: 3 months
- Additional measures: new heating system, new windows
- Owner:

“I was worried about the insulation when the facade began to crumble. The insulation was done at the same time as the roof renovation and took three months. The draughts have finally stopped and the house is much more comfortable.”
